### **Willits Water Storage Recovered**

Willits, CA – As of Wednesday, October 5, 2011, the City of Willits water system has recovered to nearly 90% of water storage from last week's treatment system mechanical problems. The City water customers may now use water for landscape irrigation and vehicle washing. The voluntary water conservation measures requested Friday, September 30, 2011, are hereby rescinded. 24 hour operations at the water treatment plant are ended.

City wants to thank its customers for their conservation during the recent event. It is important to note that water quality was not impacted. The request for extra voluntary conservation came about due to the treatment plant's diminished ability to keep up with demand.

For any questions or concerns, contact City Manager Paul Cayler at (707) 459-7221 or [caylerp@willitscity.com](mailto:caylerp@willitscity.com).
